

Prompt

Make a webpage based on the given UI

Points to note:

1. Height of each box = 1200px.
2. Padding and margin wherever required = 0.5 em.
3. The 'GO TO TOP' link at bottom right corner shouldn't move while scrolling up or down the page. It should lead to the top of the page when clicked.
4. Width is equal for identical looking boxes.
5. Assume the dimensions not specified.
6. The webpage should be responsive for given screen sizes.
7. If you're not able to write code for some parts, leave those and write the code for the rest.

Rubrics:

For coding part:

Responsive design - 20

Positioning - 20

Text - 10

Margin - Padding - Borders - 10

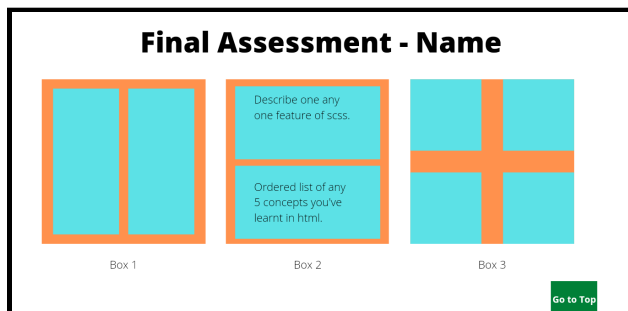

Google form:

Subjective questions - 20

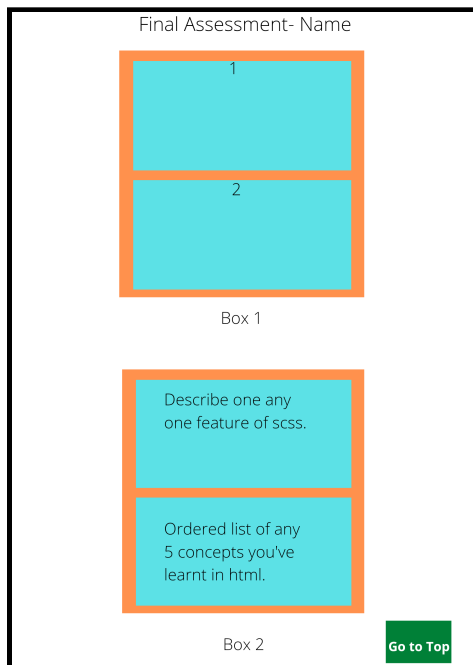

Classwork - 20

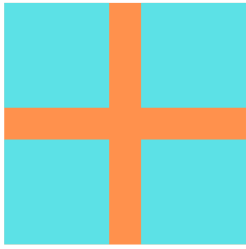

UI

For screen size > 768px

For screen size <=768px

Box 3
